Calling talented Assistant Ecologists!

Hybrid job working from home / Bury St Edmunds office / fieldwork

Overview:

Join our dynamic team as an Assistant Ecologist and contribute to impactful environmental initiatives and join our mission to enhance biodiversity and create more nature-rich spaces, and greener, more sustainable developments. As an Assistant Ecologist, you'll play a vital role in supporting ecological assessments, surveys, and conservation efforts. This position offers a unique opportunity to work in a collaborative environment where your passion for the environment can make a real difference.

Responsibilities:

- Field Surveys:** Conduct ecological field surveys to assess flora and fauna, habitat conditions, and biodiversity levels. Assist in data collection and documentation of survey findings.
- Data Analysis:** Analyse and interpret ecological data using appropriate tools and methodologies. Collaborate with senior ecologists to draw meaningful conclusions and recommendations.
- Report Generation:** Contribute to the preparation of comprehensive ecological reports, ensuring accuracy and adherence to industry standards. Present findings in a clear and accessible manner.
- Regulatory Compliance:** Stay updated on environmental regulations and assist in ensuring project compliance. Collaborate with regulatory agencies when necessary.
- Client Interaction:** Work with clients to understand project requirements and communicate ecological findings effectively. Assist in developing ecologically sound solutions.
- Team Collaboration:** Collaborate with cross-functional teams, including landscape designers, arborists, and HR professionals, to integrate ecological considerations into broader project goals.

Qualifications:

- Bachelor's degree in Ecology, Environmental or Biological Science, or a related field.
- Demonstrated fieldwork experience, including ecological surveys and data collection.
- A protected species licence is preferred (we will help you obtain this).
- Strong written and analytical skills with proficiency in ecological data analysis tools.
- Excellent written and verbal communication skills.
- Knowledge of local flora and fauna, ecosystems, and conservation practices.
- Familiarity with environmental regulations and permitting processes.
- Ability to work independently and as part of a team in a fast-paced environment.
- Full driving licence
